

ProTVSolutions

Pillow Speaker Interface for Healthcare

Control Cable or Satellite STB's with any Pillow Speaker*

Part# - PSI-ADB-2

Key features

- Allows for typical hospital pillow speakers to control a cable or sat box as well as the TV
- Now patients can enjoy a home like viewing experience using a pillow speaker
- Compatible with all major pillow speakers*
 - Anacom-Medtek, Crest, Curbell and others
 - Not necessary to replace existing pillow speakers
- Fully supports DIRECTV DRE Set Back Boxes
 - Allows installations in small facilities where head ends are not cost effective
- Compatible with most healthcare grade TV's
- Auto-senses all major pillow speaker protocols, such as Zenith, Pro:Centric and Philips
- We can easily add protocols for additional Set Back Boxes if necessary
- No external power supply necessary
- Very low-cost solution
- Only 2.1" x 1.6" x 0.6" in size, easily mounts to the SBB or back of the TV
- Ability to remap any pillow speaker key to most SBB functions
- **For a true at home viewing experience, ask about our unique SBB pillow speakers!**

* Pillow speakers must be able to support digital signals, and have a minimum # of buttons to be useful
