

Hospital TV LN572M Series

* All images in this datasheet are for illustrative purposes only.

UL-Listed Hospital TV

LN572M Series

| | |
|--------------|--|
| Screen Size | 28" / 24" |
| Resolution | 1,366 x 768 (HD) |
| Front Color | Ceramic Black |
| Broadcasting | ATSC, Clear QAM, Analog NTSC |
| Speakers | 5 W + 5 W (2.0 ch) |
| Key Features | Pillow Speaker Ready & Nurse Call Ready, Quick Menu 5.0, Multi-code IR Remote Compatible |

Pillow Speaker Ready

The hospital TV is equipped with a compatible pillow speaker* interface, giving patients the ability to control the TV sound and video from their bed.

* Pillow speaker is not provided by LG. (sold separately)

Nurse Call System Ready

Through nurse call system provided by a pillow speaker* connected to LG hospital TV, staff can be called immediately for emergency.

UL Hospital Grade Listed

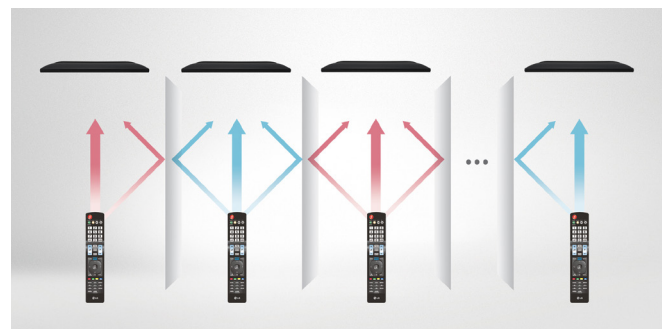

The hospital TV is designed for the healthcare and hospital environment, meeting safety standards by UL.

USB Cloning

USB data cloning makes managing multiple displays more efficient. Instead of setting up each display one by one, data can be copied to a USB* for one display, and be sent to the other displays through a USB plug-in.

* USB is not provided by LG. (sold separately)

Multi-code IR

Multi-code IR* function eliminates any remote-control signal interaction between multiple TVs in one place. LG hospital TV supports this when used with the Multi-code IR remote control, so users can freely control their own TVs without disturbing the others.

* Multi-IR remote control is not provided by LG. (sold separately)

IR Pass Through and Control

The LN572M series TVs support both the LG MPI and RS-232 external control interfaces with IR Pass Through. This feature provides an integrated two-piece solution using one guest remote control.

Welcome Screen

Display a greeting message with your hospital name and logo on the TV when it is turned on. The welcome screen provides an inviting, personalized experience for your patients.

Quick Menu

Quick Menu 5.0 enables hospital staff to easily customize and operate their own TV menus using templates, including a video creation tool to make promotional videos.

Pro:Centric V, Simple and Effective Management Tool

Supported by its own server and application, Pro:Centric V provides comprehensive solutions for RF infrastructure, letting the hospital staff deliver information effectively. With easy-to-use and customizable templates, they are able to tailor the look and feel of their content and communications, making patients and visitors feel well taken care of.
