Pro:Centric Direct

The Pro:Centric Direct hotel content management solution offers simple editing tools, making it easy to perform service and IP network-based remote management with a single click. Pro:Centric Direct enables users to customize their interface easily and efficiently manage all TVs in the facility. The most recent version provides IoT-based in-room control as well as voice control through LG Natural Language Processing.*

* Some non-LG equipment may be needed for certain IoT applications. Some features may not be supported on all Pro:Centric Direct versions. Magic Motion Remote required for voice control.

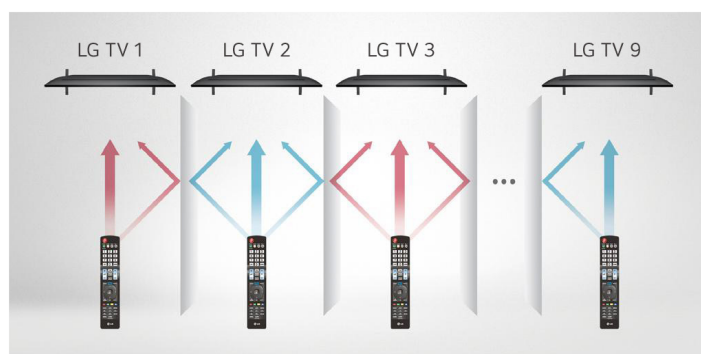

USB Cloning

For fast and easy configuration of multiple TVs, create a Master TV Setup on one TV and then export the setup "clone" file to a USB memory device. Use the USB device to easily import the setup to other TVs of the same model.

Pro:Idiom

Digital Rights Management (DRM) technology provides access to premium content to help assure rapid and broad deployment of HDTV and other high-value digital content.

Multi-code IR

Multi-code IR function eliminates any remote control signal interference between TVs in rooms with multiple TVs installed.

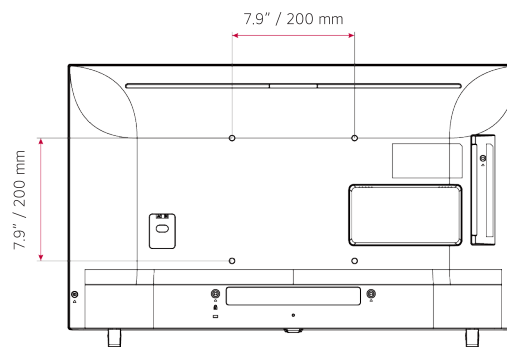

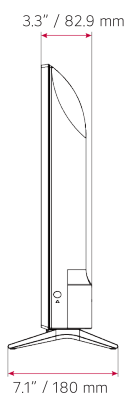

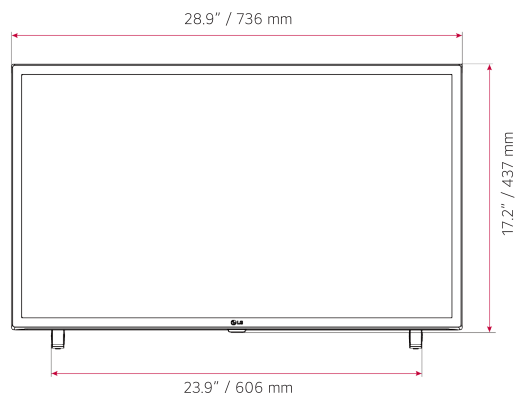

EzManager

EZ-Manager provides a convenient installation function to automatically choose settings for the Pro:Centric TV without any extra configuration.
